DETAILED ACTION

Claims

The claims are 1 to 18.

Restriction of Invention

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1 to 4, 9 to 13 and 18 drawn to a magnetic recording medium, classified in class 428, subclass 692.

Group II. Claims 5 to 8 and 14 to 17, drawn to a method of coating, classified in class 427, subclass 127.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions of Group II and Group I are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process

(MPEP § 806.05(f)). In the instant case that the product as claimed can be made by another and materially different process such as placing preformed layers in lieu of coating layers to form ferromagnetic grains and separate non-magnetic grain

boundaries, Because these inventions are distinct for the reasons given above, would be a burden on examination and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1773

3. A telephone call was made to Louis Del Juidice, esq. of Darby & Darby but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

CONCLUSION

The claims are 1 to 18.

- Restriction has been required.
- No claim has been allowed.
